PROFILE

Cofounder with 4+ years building and running **client operations** across EdTech and Talent: from customer onboarding and retention to the internal systems that keep a lean team running. Currently cofounding Supertest, an AI-personalized EdTech platform, where I own **customer success** for our institutional accounts and build, with Claude Code, the tools that run day-to-day operations.

SYSTEMS BUILT WITH CLAUDE CODE

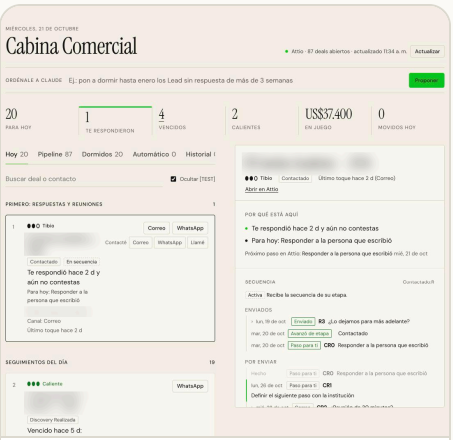

Customer success and client operations tools built solo for Supertest. Screenshots are from the real tools; institution and contact names are blurred.

Customer Journey Map B2B + B2C

One map of the whole journey, institutions and families, from first touch through sale to customer success. Each step shows its channels and flags what is still missing, so the commercial rules live in one place and the other tools stay aligned to it.
