1.0 PROFILE

Cofounder with 4+ years leading GTM and Talent Acquisition across LATAM and the U.S. — including co-founding a staff augmentation agency that recruited 100+ software professionals for VC-backed companies. Now cofounding Supertest, an AI-personalized EdTech platform, where I own GTM strategy, lead Talent Acquisition, and use Claude Code to build the internal tools that run the team's day-to-day sales and operations.

4.0 PROJECTS BUILT WITH CLAUDE CODE

Internal tools built solo for Supertest with Claude Code — supporting its GTM motion. Two flagship examples below; the rest in brief.

01

Sales Orchestrator (Slack Agent)

The command center: lives in #ventas, reads the live pipeline from the CRM, executes commercial tasks on command, and runs the other 8 agents by mention — zero terminal.

Claude Code · Anthropic API · Python · Slack Bolt (Socket Mode) · Attio API · GitHub API · DigitalOcean VPS + pm2

WhatsApp SDR & Support Agent ("Claudia")

Qualifies inbound prospects and answers customer support over WhatsApp, with human-like typing delay and urgency-routed Slack alerts.

Claude Code · Anthropic API · EvolutionAPI / Baileys · Docker · Python · VPS Deployment

- 03 Cold Outreach Sequencer — turns a CSV of target institutions into a personalized multi-touch email + WhatsApp sequence, with auto stop-on-reply and CRM sync.
- 04 Pre-Meeting Research Agent — generates a PDF research brief on an institution, delivered to Slack in ~2 minutes before every call.
- 05 Call Reviewer — pulls the latest sales call transcript, opens follow-up tasks in Linear, and drafts a CRM note with a suggested deal stage.
- 06 Internal Wiki with Natural-Language Editing — a 22-page company wiki the Slack agent can update and redeploy on command. [View live →](#)
- 07 This Website — this CV site itself, built end to end with Claude Code. [View repo →](#)
- 08 Pomo — a minimal, retro pomodoro timer with a drag-and-drop kanban board, a personal side project. [View live →](#) · [View repo →](#)
