## 1.0 PROFILE

Cofounder and Head of People & Talent Acquisition operator with 7+ years building People, Talent, and Operations functions across LATAM and the U.S. — including co-founding a staff augmentation agency that recruited and managed 100+ software professionals for VC-backed companies. Currently cofounding Supertest, an AI-personalized EdTech platform, where I lead People & Talent Acquisition and commercial strategy, and personally build — with Claude Code as my engineering team — the AI systems that run the company's growth and operations end to end.

## 2.0 COMPANIES FOUNDED

**Supertest** ↗ [supertest.co](#)

Jan 2026 – Present

ACTIVE – SCALING

Partner — People & Talent Acquisition, Commercial Strategy

AI-personalized EdTech platform preparing Colombian students for the Saber 11 and Saber Pro standardized tests, sold B2B to schools and universities. Barranquilla, Colombia.

- Leads People & Talent Acquisition for the team, and owns product vision, B2B sales (rectors, vicerrectores, deans), and commercial strategy for the Costa Caribe region.
- Designed and built, personally, with **Claude Code**, a 9-project growth & operations automation portfolio that runs the company's commercial and internal workflows: an internal Slack sales orchestrator, an AI WhatsApp SDR/support agent, a cold-outreach engine, a pre-meeting research agent, a call-reviewer that writes CRM notes and tasks, a proposal generator, and a newsletter agent.
- Acts as the company's own growth & ops engineer — integrating the Anthropic API, Attio CRM, Slack, GitHub, Fireflies, Linear, and Make.com into one operating system for a founder-led operation, running 24/7 on a self-managed VPS.

EXITED — ACQUIRED JUN 2026

Co-Founder / Head of People & Talent Acquisition

LATAM-focused staff augmentation and recruiting agency serving U.S. and European tech companies.

- Led the company to a successful exit, **acquired by another recruiting agency in June 2026** after 4+ years scaling the business.
- Recruited and managed **100+ software engineers, data professionals, and technical roles** across LATAM; led end-to-end talent acquisition, people operations, and organizational design for fully remote teams.
- Introduced automation and AI-driven workflows to streamline recruiting, candidate screening, and internal processes.

MondayLoop

Jan 2025 — Aug 2025

REALLOCATED TO SUPERTEST

Co-Founder, Growth

Consumer app devshop shipping mobile apps for the U.S. App Store market.

- Shipped and grew a 4-app consumer portfolio — **MacroMax** (AI calorie tracker), **DogDogScan** (AI dog breed ID + skin scanner), an image-to-anime line, and an AI image generator — to **1,000+ downloads** and **~\$3K MRR** combined.
- Growth ran below the threshold that justified the capital and attention required to keep scaling it — redirected both into Supertest in 2026 as the higher-leverage bet.

Rutana

Mar 2019 — Mar 2020

EARLY VENTURE

Co-Founder

University car-sharing mobile application. Barranquilla, Colombia.

- Led early operations and business development; built partnerships across 4 universities.
- Reached **500+ shared rides** among **2,000+ registered users**.

3.0 PROJECTS BUILT WITH CLAUDE CODE

A 9-project growth & operations automation portfolio built solo for Supertest, not from a software background.

- 01

**Sales Orchestrator (Slack Agent)**  
The command center: lives in #ventas, reads the live pipeline from the CRM, executes commercial tasks on command, and runs the other 8 agents by mention — zero terminal.  
Claude Code · Anthropic API · Python · Slack Bolt (Socket Mode) · Attio API · GitHub API · DigitalOcean VPS + pm2
- 02

**WhatsApp SDR & Support Agent ("Claudia")**  
Qualifies inbound prospects and answers customer support over WhatsApp, with human-like typing delay, persistent conversation history, and Slack alerts routed by urgency.  
Claude Code · Anthropic API · EvolutionAPI / Baileys · Docker · Python · VPS Deployment
- 03

**Cold Outreach Sequencer**  
Turns a CSV of target institutions into a researched, personalized multi-touch email + WhatsApp sequence, with auto stop-on-reply and CRM sync.  
Claude Code · Anthropic API · Exa.ai · Gmail SMTP/IMAP · Attio API · Python

|    |                                                                                                                                                                                                                                                                                      |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 04 | <b>Pre-Meeting Research Agent</b><br>Given an institution's name, generates a PDF brief with results, comparatives, and decision-makers — delivered to Slack in ~2 minutes, before every call.<br>Claude Code · Anthropic API · Exa.ai · Python                                      |
| 05 | <b>Call Reviewer</b><br>Pulls the latest sales call transcript, opens follow-up tasks in Linear, and writes a CRM note with a suggested deal stage — confirmed by a human, never auto-moved.<br>Claude Code · Anthropic API (Sonnet) · Fireflies.ai GraphQL · Linear API · Attio API |
